Digital Image Instructions:

Jury Process:

This is a juried exhibition meaning a panel will view images of the entered works and select for the exhibition, from those images. MAANZ enlarges your images to give the jurors' panel a detailed view of your work. The dimension requirements ensure that jurors see your work as clearly as possible and assists the panel in their decision making process. MAANZ also uses these high quality images for publicity purposes. Images **WILL NOT** be presented to the jurors' panel if image guidelines are not followed. **Please note: Artist names will be removed from the image titles before images are shown to the panel**

File Format: Save your image files in the universal JPG format using maximum quality compression.

Image Dimensions:

- Images should be between 1400 pixels and 4000 pixels longest dimension at 300PPI (pixels per inch).
- Images to be taken in focus with a neutral background, no date stamp & no heavy photo editing
- For wall hanging (2D) entries primary image to be taken face on
- Images to include frames/framing, where applicable
- Images should be accurate representations of the work
- Entries with heavy photo editing may be disqualified

MAANZ reserves the right to not include an image of a work in a printed or on-line catalogue, if it does not meet the image requirements.

File Size: no greater than 3MB

Number of Images:

For materials please provide as much detail as possible. For example **glass** should be identified as **vitreous glass, leadlight glass, etc.** Avoid terms such as **mixed media**; use a description of the three (3) most used materials in the work. This provides the jurors a better understanding of your work.

Useful Information:

How to Change the Resolution of your image

In order to change the resolution of your image, you will need a photo editing program such as Photoshop, Windows Paint, Picnik, PhotoScape, etc.

- If you need a hi-resolution image but at a smaller size, you can simply change the scale of the image to what you need, assuming your image was of high resolution to begin with.
- If you need to resize your image for email or web, you can change the pixels or the image size, which will change the resolution of the image.

Professional Photo Tips:

- Always photograph using the highest resolution your camera will provide.
- For the best results - use a 35mm digital camera with at least 12 mega pixels.
- Mobile phone or point-and-shoot type cameras do not provide a high enough image resolution.
- Make sure the whole image is sharp and in focus.
- Think about your lighting. Front or side light your work as backlighting will mute colours.
- Keep backgrounds neutral. Your work should stand out not the background. Busy textures or outdoor scenes distract viewers from your work.
- Keep the camera steady – use a tripod, rest it on a table top or against a door frame.
- Avoid cropping the image after you have taken it. Fill the frame by coming in close to the work.
- Check for shadows or reflections. They can hide parts of your work and are distracting for viewers.
- Hire a professional photographer if you need to. Remember to let them know the image requirements.

And before you hit send, always ask yourself - would I be proud to have this image printed in a catalogue or viewed on the internet?
